TRAUMA NURSE CORE COURSE (TNCC)

REQUIREMENTS

It is recommended that the RN participant has at least six months of clinical nursing experience in an emergency care setting. Other healthcare professionals such as LPNs, EMTs and RTs may audit the program as space allows. (Fees same for auditing.)

COURSE DESCRIPTION

TNCC, widely recognized as the premier course for hospitals and trauma centers worldwide, empowers nurses with the knowledge, critical thinking skills, and hands-on training to provide expert care for trauma patients.

- Rapid identification of life-threatening injuries
- Comprehensive patient assessment
- Enhanced intervention for better patient outcomes

The Trauma Nurse Core Course is a two day program designed to provide the learner with core trauma knowledge as well as psychomotor skill experience. Knowledge and skills gained in this course will enable the registered nurse to more rapidly accurately assess relevant signs and symptoms as well as plan interventions. Certification is for 4 years.

Four to six weeks prior to the course, the participant will need to read and study the materials in the 7th Edition Textbook of Trauma Nurse Core Course and access the 7th edition TNCC Provider Pre-Course Online Modules. The participant will need to bring the certificate of completion to the course.

EVALUATION, VERIFICATION AND CONTACT HOURS

ENA will issue verification upon meeting the criteria noted above. The verification will expire four years from the last day of the month in which the card was issued.
Contact hours are awarded based on the hours attended, regardless of evaluation.

Other healthcare providers working in the emergency care setting may attend the course and receive contact hours, but are not eligible for verification.

It is recommended that the RN participant has at least six months of clinical nursing experience in an emergency care setting. Other healthcare professionals such as LPNs, EMTs and RTs may audit the program as space allows. (Fees same for auditing.)

OBJECTIVES

Following this program, the participants can be expected to:
1. Discuss the nursing assessment of patients with multiple traumas.
2. Based on the assessment data, recall appropriate nursing diagnosis associated with patients who have sustained injury.
3. Plan and demonstrate appropriate interventions for a patient who has sustained an injury.

CNE

Continuing Education credit will be provided through the Emergency Nurses Association for 14.92 contact hours.

- **Code:** 14TNCC02C
- **Dates:** June 3-4, 2014 [Check for other dates](#)
